PROFESSIONAL SUMMARY

Software Developer with 1+ years of experience in automation, workflow design, and DevOps practices. Adept at building scalable solutions, optimizing processes, and supporting production systems in Agile environments.

SKILLS & TOOLS:

Languages	Python, Java, HTML, CSS, JavaScript
Framework & Libraries	React, UiPath, NLTK, SpaCy
Cloud & Backend	Azure Functions, Azure Storage, Azure Service Bus, REST APIs (exposure)
DevOps & Tools	Azure DevOps, CI/CD pipelines, Git, Docker (basic), ICM
RPA & Automation	UiPath, UiPath Orchestrator, REFramework, Document Understanding, Power Automate, Queue automation (Basic)
AI & ML	NLP, text processing, resume ranking, model-based scoring (Python, Pytorch)
Method & Practices	Agile-Scrum, DevOps, code reviews, production support, exception handling

PROFESSIONAL EXPERIENCES:

Associate Software Development: Bosch Global | Jan 2025 – Present | Hyderabad

Project -RNA : Microsoft

- Automated critical workflows using **Power Automate**, including alerts for missing required fields in Incidents/SRs, TTE breach notifications and many more.
- Supported automation and operations using **Azure DevOps, Azure Portal, and ICM**, improving incident resolution efficiency.
- Participated in Agile ceremonies, code reviews, and CI/CD pipeline activities.

RPA Solution Associate: Elfonce Technologies | Jan 2024 – Dec 2024 | Bengaluru, India

- Developed high-impact UiPath automations (85% effort reduction, 72% downtime reduction) with DU workflows (95% accuracy) and API integrations.
- Led full automation lifecycle and L3 production support in Agile environments.

Project Trainee – AI & Automation (Internship) : Bosch Global | Nov 2022 – July 2023 | Bengaluru, India

- Built an AI-driven ATS using Python, NLTK/SpaCy, and PyTorch to automate resume processing (1000+/day) with 90% match accuracy, cutting screening time by 75% and reducing processing time from 5 mins to 30 seconds.

EDUCATION

B.Tech in CSE | REVA University | CGPA: 9.17 | Aug 2019 – Aug 2023

PROJECTS

1. DataWhisper - AI Powered Database Query Sytem

[GitHub](#)

Built a natural-language-to-SQL system with safe execution, schema inspection, and automated query validation.

2. AI-Powered Resume Processing Software

[GitHub](#)

Developed a software to ingest, parse, vectorize, and rank large volumes of resume data using NLP and ML models.

3. Simple Task Management App

[GitHub](#)

Built a To-Do application that lets users add, delete, and mark tasks as completed for simple task tracking.

CERTIFICATIONS

- UiPath Automation Developer Associate
 - Python Programming – Coursera
 - Version Control – Coursera
 - Learning Analytics – NPTEL
-
